

- Do you realize that any affiliate or sales person has to SELL a product for:
 - \$1000 to make a **\$100 commission payment** if the commission is 10%
 - \$2000 to make a **\$100 commission payment** if the commission is 5%
 - \$500 to make a **\$100 commission payment** if the commission is 20%

- Do you realize that REACH is **paying you**:
 - **\$100** to give one of two products away for FREE where nobody has to purchase anything?
 - Product 1 is to apply for a **zero down home loan** for renters that have a regular income & a credit score of at least 620 - you get paid if they get accepted irregardless if they use the loan to purchase a home or not
 - Product 2 is for existing home owners to find out about their **solar home value** by uploading their energy bill & participating in a presentation customized to them that establishes if it might make sense for them to integrate solar or not. You get paid for them just showing up to the presentation - regardless if they decide to get into solar or not

Anyone on the planet can participate in the above scenario to earn \$100 by giving away 2 FREE products. Product 1 can be consumed by about 1-2% of the global population which is residents in the United States that rent. Product 2 can be consumed by about 2-5% of the global population which is residents in the United States that own a home.
